## Notice / 'Tower of Babel' is now on OBT (EN)

We're launching an open beta of 'Tower of Babel'.

Download the client for your environment, play, and feel free to leave us a review.

The download link is valid until October 15, 2023.

Key descriptions
- Arrow keys (Up, Down, Left, Right): Move cursor
- Enter(return): Select
- Backspace: Cancel (in certain situations)

Control key guides will be included in future games.

We didn't certificate windows and linux's client.
Vaccine and firewall may detect it's a virus, but we sure about its safe file.
Mac's client already certificated. If this can put you at ease, you can use this client.
This is a natural concern, and I respect your choice because it is a natural right.
We will try to find a better way next time.
